Dear HR

I am writing to you to express interest in application for systems modelling engineer position as advertised on LinkedIn and renaultsport.com. I am at the time of completing my studies to obtain the M.Sc in mechatronic engineering. Having already a bachelor's degree in mechanical engineering.

During my university career I have always developed projects both in groups and individually, always reaching the best goals and achieving all the required objectives.

I acquired skills in the use of design and modeling in suites like Ansys. I have matured experience in using Matlab and its advanced use integrated with other software. I also have a good knowledge of symbolic manipulation software such as Maple. I can briefly learn new software.

Even if I am completing the M.Sc., I have developed a critical thinking, the ability to analyze and to propose the best solution as well as the ability to work in a team. I offer my skills, but above all my desire to start working, experimenting and growing professionally.

Thank you for your time and consideration.

Yours Sincerely  
Francesco Argentieri
